## SUMMARY

Senior PHP Developer with hands-on experience in PHP, MySQL, REST APIs, WordPress, AI/ChatGPT integrations, JavaScript, and server-side deployment. Focused on building modular systems, optimizing database queries, integrating external APIs, and improving performance across full stack. Experienced in managing hosting, DNS, SSL, and VPS environments while delivering AI-enabled PHP products, gaming platforms, and 40+ WordPress-based applications.

## SKILLS

**Frontend:** HTML, CSS/CSS3/SCSS, Javascript, jQuery, Ajax, Node.

**Backend:** PHP, Python, SQL, REST APIs, AI API Integrations (OpenAI/ChatGPT)

**Databases:** MySQL, MongoDB

**Security:** Penetration testing, Network Scanning

**Tools:** Git, cPanel, Hostinger, VPS, Domain/DNS Management, Elementor, WordPress Builders

**Framework:** Laravel, Bootstrap

## WORK EXPERIENCE

### Linepay Solutions Pvt. Ltd.

Navi Mumbai, Maharashtra

*Senior PHP Developer*

Dec 2024 - Present

- Developed **JyotishAstro**, an advanced astrology platform that uses **GPT AI** to generate human-like astro predictions and conversations.
- Created **40+ WordPress websites**, including custom themes, Elementor designs, and plugin integrations.
- Added **external features** like payment gateways, API integrations, custom forms, and automation.
- Managed **Hostinger accounts & VPS servers**—domain transfers, website migrations, DNS setups, SSL, backups.
- Built a **gaming website for kids** using pure JavaScript where Google Ads appear between game sessions.
- Worked extensively on **frontend UI/UX**, creating responsive, creative, and mobile-optimized designs.
- Collaborated with senior developers on optimizing PHP logic, database queries, and website speed improvements.

### Makends

Mumbai, Maharashtra

*Fresher*

Apr 2023 - Dec 2024

- I have developed a reusable PHP component to streamline website development, reducing coding time by 40%.
- I have collaborated with cross-functional teams to integrate the reusable PHP component into various projects, resulting in a 25% reduction in debugging time and an increase in code readability.
- We utilized object-oriented programming principles to create a modular PHP component, resulting in improved code readability and maintainability. Here is my project link which I built from scratch. "<https://pph.ae/>"

## PROJECTS

### **JyotishAstro – AI Astrology Website (PHP + GPT)**

AI-powered astrology website that generates personalized astro reports using OpenAI/GPT and provides human-like chat responses.

### **Kids Gaming Website (JavaScript)**

Pure JS gaming site for children with integrated Google Ads that appear between gameplay sessions.

### **40+ WordPress Websites**

Custom designs, Elementor, WooCommerce, API integrations, custom plugins, domain/server setup.

### **E-Commerce Platform (PHP/MySQL)**

Self-built e-commerce website using HTML, CSS, JavaScript, PHP, and MySQL

### **AI Voice Assistant (Python)**
